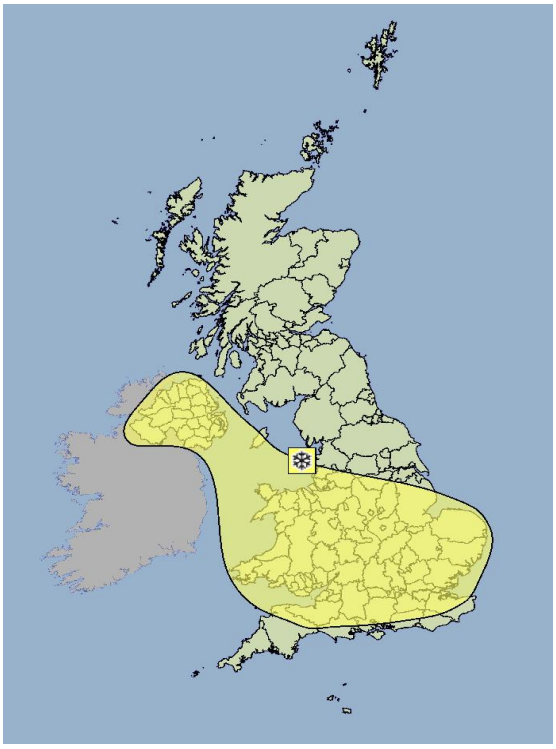
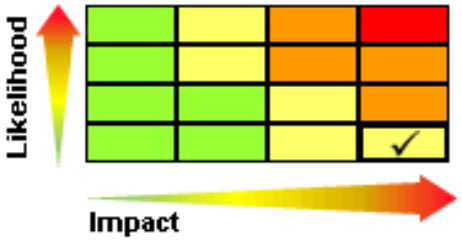
National Severe Weather Warning Service





Chief Forecasters Assessment
A weather system is expected to continue to move north into Friday and has potential to produce widespread snow, accompanied by strong winds. As less cold air follows from the south, there is a chance of snow turning to freezing rain bringing an additional ice risk. There is still uncertainty in how this system will develop but there is a small chance of the combined effects of snow, strong winds and ice leading to severe impacts.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **00:05 on Fri, 02nd Mar 2018** until **18:00 on Fri, 02nd Mar 2018**

There is potential for a spell of heavy snow, accompanied by strong winds, to affect much of Northern Ireland, Wales together with central and southern England on Friday.

There is a small chance that long delays and cancellations on bus, rail and air travel could occur. There is a slight chance that roads may become blocked by deep snow, with stranded vehicles and passengers. There is a small chance that long interruptions to power supplies and other services such as telephones, may occur.
